

## Groveland (Essex)

Groveland is a town in Essex County with 1,354 residents aged 65 and older. Compared to state average rates, older residents in Groveland have lower rates of tooth loss, PTSD, and schizophrenia. However, they have higher rates of cataract. Older Groveland residents are more likely to take the health promotion step of having an annual dental exam. Community resources to support healthy aging include a COA and a public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		6,742	6,984,205
Population 60 years or older as % of total population		28.5%	23.8%
Total population 60 years and older		1,920	1,661,076
Population 65 years or older as % of total population		20.1%	17.1%
Total population 65 years and older		1,354	1,195,589
% 65-74 years		61.1%	58.4%
% 75-84 years		32.2%	28.1%
% 85 years or older	*	6.7%	13.4%
% 65+ population who are female		56.9%	56.2%
% 85+ population who are female		71.4%	66.6%
Race and ethnicity of the population 65+			
% White		94.0%	86.3%
% African American	*	0.0%	4.4%
% Asian		0.0%	4.0%
% Other race(s)		6.0%	5.3%
% Hispanic		1.5%	4.8%
# 55+ who are Native American / Alaskan		0	3,537
Marital status of the population 65+

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
