

Salisbury (Essex)

Salisbury is a town in Essex County with 1,989 residents aged 65 and older. Compared to state average rates, older residents report better outcomes on several healthy aging indicators, including lower rates of tooth loss, Alzheimer's disease or related dementias, anemia, cataract, glaucoma, osteoporosis, pressure ulcer, and schizophrenia. However, they experience higher rates of chronic obstructive pulmonary disease (COPD), fibromyalgia/chronic pain/fatigue, hypertension, migraine, substance and tobacco use disorders, anxiety disorder, and high cholesterol. They are more likely to engage in the health promotion activity of having annual dental exams. Community resources to support healthy aging include a COA, an assisted living facility, and a public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		9,182	6,984,205
Population 60 years or older as % of total population		30.8%	23.8%
Total population 60 years and older		2,827	1,661,076
Population 65 years or older as % of total population		21.7%	17.1%
Total population 65 years and older		1,989	1,195,589
% 65-74 years		56.0%	58.4%
% 75-84 years		33.6%	28.1%
% 85 years or older		10.4%	13.4%
% 65+ population who are female		55.3%	56.2%

% 65+ hospice users as % of decedents		40.0%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.

Data Sources:
