

## Tyngsborough (Middlesex)

Tyngsborough is a town in Middlesex County with 1,539 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, benign prostatic hyperplasia, cataract, fibromyalgia/chronic pain/fatigue, glaucoma, osteoarthritis/rheumatoid arthritis, pressure ulcer, and prostate cancer. However, they have a higher rate of liver disease. They are more likely to take the health promotion step of getting an annual physical exam and are less likely to get screened for colorectal cancer. Community resources to support healthy aging include a COA, one community health center, one public library, and one home health agency.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		12,371	6,984,205
Population 60 years or older as % of total population		19.3%	23.8%
Total population 60 years and older		2,391	1,661,076
Population 65 years or older as % of total population		12.4%	17.1%
Total population 65 years and older		1,539	1,195,589
% 65-74 years	*	73.9%	58.4%
% 75-84 years		20.3%	28.1%
% 85 years or older	*	5.7%	13.4%
% 65+ population who are female		48.9%	56.2%
% 85+ population who are female		72.7%	66.6%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
