

Boxford (Essex)

Boxford is a town in Essex County with 1,601 residents aged 65 and older. Compared to state average rates, older residents in Boxford have significantly lower rates of tooth loss, Alzheimer's disease or related dementias, anemia, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, hypertension, ischemic heart disease, peripheral vascular disease, pressure ulcer, substance and tobacco use disorders, depression, anxiety disorder, PTSD, and schizophrenia. They are more likely to take the health promotion steps of having annual dental exams. Community resources to support healthy aging include a COA, a public library, and four primary care providers.

% 65+ hospice users as % of decedents		43.3%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
