# Danvers (Essex)

Danvers is a town in Essex County with 5,943 residents aged 65 and older. Compared to state average rates, older residents have lower rates of tooth loss. However, they have higher rates of Alzheimer's disease or related dementias, anemia, asthma, atrial fibrillation, breast cancer, cataract, chronic kidney disease, fibromyalgia/chronic pain/fatigue, hypertension, liver disease, osteoarthritis/rheumatoid arthritis, osteoporosis, peripheral vascular disease, pressure ulcer, depression, anxiety disorder, schizophrenia, and high cholesterol. Danvers' older residents are more likely to have a regular doctor, have annual dental exams, and always drive or ride wearing a seatbelt. Community resources to support healthy aging include a COA, two home health agencies, one hospice agency, an Alzheimer's caregiver support group, five assisted living facilities, one public library, 112 primary care providers, five skilled nursing facilities, and two public universities or community colleges.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		27,910	6,984,205
Population 60 years or older as % of total population		28.2%	23.8%
Total population 60 years and older		7,872	1,661,076
Population 65 years or older as % of total population		21.3%	17.1%
Total population 65 years and older		5,943	1,195,589
% 65-74 years		53.7%	58.4%
% 75-84 years		29.5%	28.1%
% 85 years or older		16.8%	13.4%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
