

Andover (Essex)

Andover is a town located in Essex County and has 5,644 residents aged 65 and older. Compared to state average rates, older residents have lower rates of tooth loss, asthma, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, fibromyalgia/chronic pain/fatigue, heart attack, hypertension, ischemic heart disease, peripheral vascular disease, stroke, substance and tobacco use disorders, depression, PTSD, and high cholesterol. However, they report higher rates of glaucoma. They are more likely to take the health promotion steps of always wearing a seatbelt while driving, having a regular doctor, and annual dental exams. Community resources to support healthy aging include a COA, one community health center, three home health agencies, one public library, three assisted living facilities, 20 primary care providers, and two skilled nursing facilities.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		36,389	6,984,205

% 65+ hospice users as % of decedents	*	57.1%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
